

Measurements and monitoring as a key to improvement and reduction of losses.

COMPANY PROFILE

We focus on **monitoring and measurement** as a key part of **continuous improvement** process of IT and other areas of the organization, optimizing the availability of systems and infrastructure and **avoiding losses of money and quality** for failures that can be anticipated proactively.

WHY METRIX? THREE GOOD REASONS...

1. **METHOD AS A GUARANTEE.** We developed our own methodology that combines the frameworks of ISO 9001, OKRs and monitoring as a keys to measure and improve.
2. **EXPERIENCE.** 25 years of execution of connectivity and IT projects in different vertical markets.
3. **COLLABORATION.** We combine the provision of the solution with the training and transfer of know-how to the customer as to improve

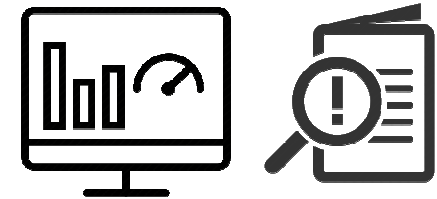

PRODUCTS AND SERVICES.

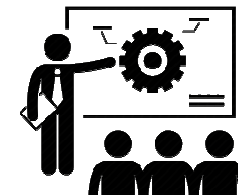

- **ASSESSMENTS.**

Measurement, diagnosis and technical review service focused on improvement.

- **TRAINING & COACHING.**

Training or coaching service to improve the operation of the monitoring platform. We combine hands-on training on the same installation of the client to make the improvement process more efficient.

- **MONITORING**

Paessler Partner Silver for PRTG Network Monitor solution and Kentix smart environment monitor

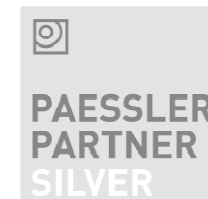

PRTG. General purpose monitoring.

We provide a comprehensive monitoring platform that adapts to all scenarios quickly and easily: health, manufacturing, services, environmental control, access security, IT infrastructure.

1. To anticipate or avoid risks and failures.
2. To improve processes
3. To notify conditions that require attention
4. To continuously measure key elements for the organization

<https://www.paessler.com>

KENTIX. Smart Security that prevent looses

System of alarms and monitoring of environmental variables that anticipate conditions that attack assets, such as:

- Excessive or too low temperature
- Humidity and condensation points
- Carbon monoxide: early detection of fire
- Fluids, broken pipes, floods
- Intrusion in sensitive areas

Easily integrated with the PRTG monitoring console or any other using SNMP

KENTIX
Certified  Partner

SERVICES. Building your own monitoring!

We build monitoring solutions tailored to the needs of the client:

1. For traditional industry, with MODBUS sensors and as an alternative to SCADA systems
2. For health, diagnosis by DICOM images, laboratories, etc.
3. For IoT solutions in agriculture, marketing
4. For ecommerce or marketing

or any model that prevents losses, increases quality or guarantees processes of improvement and digital transformation.

SOME BUSINESS CASES

Network assessment service in three LATAM locations for review of IT infrastructure and proposals for improvement in 7 key areas.

Measurements of network traffic and analysis of protocols to diagnose performance problems in business applications.

IT crew training for implementation and use of monitoring platform with SLA dashboards and diagnosis of business applications.

Implementation and training of PRTG Network Monitor for control of the international WAN network with 400 links, including IP telephony services.

THANK YOU!
